

LinkedHashMap :

```
package p1;

import java.util.*;

public class LinkedHashMap {

    public static void main(String[] args) {
        Map<String, Integer> mapp1 = new LinkedHashMap<>();
        mapp1.put("One", 1);
        mapp1.put("Two", 2);
        mapp1.put("three", 3);
        for (Map.Entry<String, Integer> a : mapp1.entrySet())
            System.out.println(a.getKey() + " " + a.getValue());
    }

}
```
